

INSITE: Medication Management for Long-Term Care

INSITE[™] | LONG-TERM CARE

Talyst, a leader in pharmacy automation, has created the first medication management system designed specifically for long-term care. Talyst InSite enables patient-specific medication dispensing right at the care facility. It delivers dramatic cost savings by reducing medication waste, saves valuable nursing staff time, and improves patient safety.

The InSite Solution

The InSite™ system puts a secure, automated remote dispensing unit at the care facility, and uses powerful software to ensure the right medications are available on-demand, accessed by the right personnel, and packaged for a specific patient. The process is automated, accurate, and can quickly package pharmacist-approved medications before each medication pass, or on-demand to facilitate new residents, First Doses, and PRNs.

INSITE: Streamlining the Medication Dispensing Process

ELIMINATES WASTE & SAVES TIME

InSite can virtually eliminate medication waste by dramatically reducing or eliminating the need to create time-consuming, waste-prone blister packs. The average InSite canister holds about 300 doses, and can be filled and processed in about the same time it takes to create a single 30-day blister pack.

InSite enables automated and accurate dispensing:

- Medications are dispensed only as needed, and for a specific patient or medication pass
- Changes in prescribed medications or patient residency will no longer produce unused blister packs that need to be destroyed or returned
- It reduces the number of medication deliveries and expensive special courier runs required
- InSite can provide inventory and dispensing information for down-to-the-dose accountability at each facility

With InSite, medication orders are transmitted to the pharmacist for clinical review. After approval, the medications are immediately available at the long-term care facility and dispensed from the InSite remote dispensing unit with patient-specific packaging.

InSite gives your staff the time to perform other tasks:

- Can eliminate blister pack-related storage, access, and inventory management concerns
- Dramatically reduces the time needed to prepare for scheduled medication passes
- Eliminates the need to perform time-consuming narcotics counts
- Works with existing information systems, basing its automated inventory replenishment requests on actual medication usage

INSITE: The Right Medication to the Right Patients

IMPROVES PATIENT SAFETY

InSite enables faster First Doses, STAT orders, and accurate, timely medication passes. The InSite Remote Dispensing System stores up to 500 different medication types in a single, remote dispensing unit. It provides automated, on-demand compliance packaging for oral solid medications prior to administration.

InSite delivers patient-specific packaging with customizable nurse-friendly labels

- Before delivery, each canister is filled, security sealed, checked and signed by the pharmacist
- Allows automatic inventory monitoring and lot and expiration tracking
- Supports an Automatic Canister Recognition System for added safety
- Restricts access to stored medications with password-protection and locking metal doors
- Packages up to 60 doses per minute with a broad variety of sorting options
- Enables additional nursing time for patient safety issues such as fall-prevention

About Us

Talyst is engineering the safer pharmacy. The company was founded in 2002 to provide easy-to-use, automated medication management systems to acute care hospital pharmacies. The following year, Talyst launched AutoPharm®, the innovative software platform designed to integrate medication storage, inventory, ordering, barcoding, and clinical systems.

By 2009, Talyst had installed automated systems in close to 400 acute care hospitals and integrated healthcare companies. By leveraging our expertise in acute care pharmacy automation, we are now building unique systems designed specifically to meet the needs of long-term care facilities and correctional institutions. Talyst is dedicated to delivering world-class software and proven hardware components to enhance efficiency, provide greater inventory control, and improve patient safety in all environments.

OUR SERVICE COMMITMENT

Talyst is committed to our customers, and dedicated to delivering the highest levels of satisfaction in the implementation of our products. We apply ISO 9000 principles to respond to the needs of our customers with proven solutions, targeted training, and complete support.
